IRATA TRAINING SCHEME FLOWCHART

See IRATA *General requirements* for the detailed syllabus, requirements for levels 1, 2 and 3 rope access technicians, and principal contra-indications to working at a height and other relevant information.

*Any level rope access technician undertaking re-assessment after the expiry of the current assessment would require a minimum of four days of training instead of the two days. Holders of expired level 2 or 3 certificates or others with questions should contact an IRATA training company for information on revalidation procedure. To ensure technicians are up to date with certification, re-assessment may be done up to 6 months before due expiry date without any time penalty.

Each IRATA member company should ensure employees hold valid assessments.
